PROJECTS

Star Clinic

Developed a scalable Doctor-Patient eCommerce platform enabling appointment booking, medical product purchases, and health record management. Built responsive and user-friendly interfaces using React.js, Tailwind CSS, and React Hook Form.

- Key Responsibilities:
- Created interactive pages for doctor listings, appointments, and product catalog using React.js
 - Integrated REST APIs for real-time data (doctor availability, products, patient details)
 - Developed dynamic forms for registration, feedback, and checkout
 - Collaborated with backend team and handled validations & error states
 - Built reusable UI components to improve development efficiency
 - Ensured responsive and accessible design across devices

SKG Enterprise

- Developed and deployed a responsive e-commerce website for SKG Enterprise
- Designed modern UI/UX aligned with brand identity
- Built structured product catalog and listings
- Implemented seamless navigation for better user experience
- Ensured cross-device compatibility (mobile, tablet, desktop)
- Optimized performance for fast loading
- Added key sections like hero banner, product highlights, and trust indicators
- Improved user interaction and overall online presence
- Integrated add-to-cart and shopping flow
- Payment gateway integration
- User authentication and admin panel

PNSD Infection

- Developed and deployed a responsive educational website for PNSD
- Designed clean and user-friendly UI for better accessibility
- Implemented structured navigation for smooth user experience
- Created dynamic sections for teacher profiles and announcements
- Added contact information and institutional content display
- Ensured cross-device compatibility (mobile, tablet, desktop)
- Optimized website performance for fast loading
- Enhanced overall user engagement and digital presence
